Tuesday 6th December 2022

Dear Parent/Carer,

We have been informed that a child who attends Mount St. Catherine's Primary School has been diagnosed with confirmed scarlet fever. Although scarlet fever is usually a mild illness, it should be treated with antibiotics to minimise the risk of complications and reduce the spread to others.

The symptoms of scarlet fever include a sore throat, headache, fever, nausea and vomiting. This is followed by a fine red rash which typically first appears on the chest and stomach, rapidly spreading to other parts of the body. On more darkly pigmented skin, the scarlet rash may be harder to spot, but it should feel like 'sandpaper'. The face can be flushed red but pale around the mouth.

If you think you, or your child, have scarlet fever:

- **see your GP or contact the NHS as soon as possible.**
- **make sure that you/your child takes the full course of any antibiotics prescribed by the doctor.**
- **stay at home, away from the playgroup, school or work for at least 24 hours after starting the antibiotic treatment, to avoid spreading the infection.**

Children who have had chickenpox recently are more likely to develop more serious infection during an outbreak of scarlet fever and so parents/carers should remain vigilant for symptoms such as a persistent high fever, cellulitis (skin infection) and arthritis (joint pain
